Note: These reports will be published on a flow basis through the end of 1999. You should be prepared to wait if your order is placed early in the year. Use this form to order individual reports only. See reverse to order complete report series.

## Now Available

### 1997 Employment, Payrolls, and Number of Establishments

County Business Patterns is an annual series that provides subnational economic data by industry. The series is useful for studying the economy of small areas and analyzing economic changes over time. Most of the industries comprising the Nation's economy are covered in these reports: agricultural services, forestry, fishing; mining; construction; manufacturing; transportation and public utilities; wholesale trade; retail trade; finance, insurance, real estate; and services. Data are tabulated by industry as defined in the Standard Industrial Classification (SIC) Manual: 1987.

County Business Patterns data are available in a series of printed reports, including a separate publication for each state, the District of Columbia, Puerto Rico, and a U.S. Summary. The data also are available on CD-ROM, computer tape, and diskette. A sample of County Business Patterns data is available on the Internet: <http://www.census.gov/>.

Individual printed reports present payroll and employment data for the state and counties by industry. The reports also include the number of establishments by industry and employment size class.

The U.S. Summary report presents similar data for the Nation as a whole. In addition, the U.S. Summary provides employment and payroll data by employment size classes for major industry groups.

### How to Purchase Printed Reports

To order County Business Patterns printed reports, complete and return the attached order form. You may subscribe to the entire series and save a substantial amount on the price of the reports purchased individually. These reports will be issued on a flow basis through the

end of 1999. Data for industries with fewer than 100 employees, as well as data for detailed industries withheld to avoid disclosing data for individual companies, are not shown in the printed reports. However, these data are available on CD-ROM and other computer products.

### Data in Other Formats

County Business Patterns data are available on CD-ROM. The CD-ROM contains 1997 and 1996 County Business Patterns data and menu-driven access software. The CD-ROM also includes software for creating County Business Patterns data files compatible with popular database and spreadsheet software.

County Business Patterns data also are available on computer tape and diskette (limited data). For information and to order other County Business Patterns data products, contact:

**Other Sources of Assistance**

**Government Depositories** in the reference sections of many university and large public libraries maintain collections of the publications described in this order form.

**State Data Centers** and their affiliates, located in all states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands, have recent publications and computer products for their respective areas.

Business and Industry Data Centers are a special initiative underway in several states; the centers and their affiliates specialize in economic data and services for the business community.

**Department of Commerce District Offices** in over 40 cities have Census Bureau materials for use or order (see local telephone directories under "United States Government" for locations).
